ISBN 974-657-424-8

### DEDICATION

This volume is dedicated to the memory of Dr. Apichart Kaosa-ard, who served on the steering committee of this project. He was a fine practitioner and teacher of forestry both at the Royal Forest Department and at Chiang Mai University and will be deeply missed by all those who love Thailand's trees.

ITTO

## CONTENTS

Acknowledgements

### **OPENING SPEECHES**

Report by the Dean of the Faculty of Science

- Kittichai Watananigorn

Opening Declaration by Chiang Mai University Vice President for Planning and Developmental Affairs

- Sampan Srisuwan

Statement on behalf of the International Tropical Timber Organization (ITTO)

- Efransjah

### **PART ONE – OVERVIEWS**

Defining forest restoration for wildlife conservation

- Stephen Elliott

Trends of wildlife conservation in changing forest resource situations in the Asia-Pacific Region

- Masakazu. Kashio

Some ecological principles for re-assembling forest ecosystems at degraded tropical sites.

- David Lamb

Catalysing natural forest restoration on degraded tropical landscapes

- John A. Parrotta

### **PART TWO – COUNTRY AND PROJECT REVIEWS**

Introduction

- Janice Kerby

A brief review of forest restoration programmes in Myanmar

- Sein Maung Wint

A review of forest status in Bangladesh and the potential for forest restoration for wildlife conservation

- Md. Abdur Rashid

Decline of the Philippine forest

- Marlea P. Munez

Use of native species in forest rehabilitation and conservation in Vietnam

- Nguyen Hoang Nghia

Promoting native tree species in land rehabilitation in Hong Kong, China

- Billy C. H. Hau

Rivers in jeopardy: a village community's response to the destruction of their upper watershed forests in the Mae Soi valley catchment, northern Thailand

- M. R. Smansnid Svasti

The potential of local tree species to accelerate natural forest succession on marginal grasslands in southern Vietnam

- Nguyễn Văn Sôu

Accelerating rehabilitation of native forest by establishing a seedling production site in South China

- Zhuang Xueying, Wang Tong, Huang Jiuxiang, Zeng Rongre and Huang Jiancheng

Poster Abstracts

### **PART THREE – ACCELERATED NATURAL REGENERATION**

Introduction

- Kate Hardwick

Research needs for the ecology of natural regeneration of seasonally dry tropical forests in Southeast Asia

- Kate Hardwick, John Healey and David Blakesley

The process of natural forest regeneration after shifting cultivation in Ky Son district, Nghe An province, Vietnam

- Hoang Van Son

Assisted natural regeneration: methods, results and issues relevant to sustained participation by communities

- Patrick Dugan

Poster Abstracts

### **PART FOUR – SPECIES SELECTION AND TECHNOLOGIES FOR GROWING AND PLANTING SEEDLINGS**

Introduction

- David Blakesley

Nursery technology and tree species selection for restoring forest biodiversity in northern Thailand

- David Blakesley, Vilaiwan Anusarnsunthorn, Janice Kerby, Puttipong Navakitbumrung, Cherdak Kuarak, Sudarat Zangkum, Kate Hardwick, Stephen Elliott

Tree Species Selection in Thailand: Various species for various purposes

- Anders P. Pedersen

Mycorrhizal seedling production for enhancing degraded forest rehabilitation in Indonesia

- Yadi Setiadi

Performance of six native tree species, planted to restore degraded forestland in northern Thailand and their response to fertiliser

- Stephen Elliott, Puttipong Navakitbumrung, Sudarat Zangkum, Cherdsak Kuarak, Janice Kerby, David Blakesley and Vilaiwan Anusarnsunthorn

Propagation of native trees to restore degraded forest ecosystems in northern Thailand

- Cherdsak Kuarak, Stephen Elliott, David Blakesley, Puttipong Navakitbumrung, Sudarat Zangkum and Vilaiwan Anusarnsunthorn

Poster abstracts

## **PART FIVE – WILDLIFE**

Inter-relationships between wildlife and forest restoration

- Stephen Elliott

Wildlife colonisation on restored tropical lands: What can it do, how can we hasten it, and what can we expect?

- Nigel I. J. Tucker

Ecorestoration of Girnar forest and recapture of lost territory by *Panthera leo persica* (Asiatic Lion)

- Bharat Lal, IFS

Seed Dispersal and Forest Restoration

- Richard T. Corlett and Billy C. H. Hau

The effect of artificial perches and local vegetation on bird-dispersed seed deposition into regenerating sites

- Rebecca Scott, Puntipa Pattanakaew, J. F. Maxwell, Stephen Elliott and George Gale

## **PART SIX – WORKING WITH COMMUNITIES**

Introduction

- Kevin Woods

Forest restoration and community participation: case studies in Thailand

- Somsak Sukwong

Rainforestation farming: an alternative to forest restoration

- Paciencia P. Milan

The Phu Khieo Buffer Zone Project- sustainable rural development through community management

- Colin McQuistan and Arthur G. Wright

Poster abstracts

**PART SEVEN – THE CHIANG MAI RESEARCH AGENDA TO RESTORE DEGRADED FOREST  
LANDS FOR WILDLIFE CONSERVATION IN SOUTHEAST ASIA**

Introduction

Plantation Design

Seed Dispersal

Fire Management

Species selection, nurseries and planting

Social and Community Issues

Other identified research areas

Establishing a regional contact network for forest restoration for wildlife conservation

- Janice Kerby

Implementing the research agenda

- Stephen Elliott, Janice Kerby, Visut Baimai and Apichart Kaosa-ard

**AUTHORS AND PARTICIPANTS**

**INDEX**

## ACKNOWLEDGEMENTS

This volume presents the proceedings of a regional workshop on Forest Restoration for Wildlife Conservation held at the Tarin Hotel, Chiang Mai, Northern Thailand, from 30<sup>th</sup> January to 4<sup>th</sup> February 2000. The meeting was organized by the Forest Restoration Research Unit (FORRU), Department of Biology, Faculty of Science, Chiang Mai University.

The organizers thank the International Tropical Timber Organization for generously providing most of the financial support needed to run the workshop. The International Union for Forestry Research Organizations, the British Council, the Biodiversity Research and Training Programme, and Shell Forestry Limited also provided funding for the meeting, whilst Chiang Mai University, the Royal Forest Department and the Department of Technical and Economic Co-operation provided institutional support.

Furthermore, the organizers are grateful to the staff of the Tarin Hotel for providing excellent service during the workshop. We also thank Payong Chatwiroom, Paiboon Sawetmelanon, Apichart Kaosa-ard and Somsak Wanichacheewa for serving on the workshop steering committee. Many CMU staff and students helped with the running of the workshop and the production of these proceedings. We are especially grateful to Sudarat Zangkum, Natenapit Jitlam, Rungtiwa Bunyadod, Greuk Pakkad, Tim Rayden, Oranut Khopai, Puttipong Navakitbumrung, Cherdsak Kuarak, Thonglaw Seethong, Jumpee Bunyadit, Naeng Zeedong. The conservation committee of Ban Mae Sa Mai welcomed workshop participants to their village and we very much appreciate their hospitality.

All workshop participants contributed in some way to the words in this volume. The research agenda in Part 7 is the product of intensive discussion sessions during the workshop, in which everyone participated. The editors drafted the research proposals in Part 7 from notes taken during the discussion and feedback sessions.

The editors thank reviewers who provided useful feedback on draft manuscripts, in particular John Parrotta, David Lamb, George Gale, Nigel Tucker, Laura Johnson and Jens Granhof.

Finally, we thank Dr. Efransjah of ITTO for his helpful comments and advice throughout organization, implementation and reporting of the workshop and production of these proceedings.
